

Pound Cake *(Ingredient Alternative - Egg)*

When eggs are not desirable due to cost, availability, or allergen issues, whey protein can be used successfully to partially or completely replace eggs. This formula comparison demonstrates how whey protein concentrate can fully substitute for eggs and maintain a desirable texture in pound cake. In addition, the whey protein pound cakes are lower in cholesterol compared to many egg formulas.

Hilmar™ 7000 Whey Protein Concentrate is an excellent replacement for egg ingredients in bakery mixes and finished baked goods. It aids in emulsifying fat and improving texture by maintaining moisture content and volume. In addition, **Hilmar™ 7000 Whey Protein Concentrate** is rich in phospholipids similar to those found in egg. Along with functional contributions, Hilmar whey proteins are complete proteins providing the essential amino acids in an optimum blend for human consumption. Whey proteins have a PER of 3.2, a “perfect” PDCAAS of 1.00, and have a low glycemic load at 2 per 100 grams for concentrates and <1 for whey protein isolates.

Ingredients (Control): All Purpose Flour, Sugar, Eggs, Butter, Milk, Lemon Extract, Baking Powder, Vanilla Extract, Salt.

Ingredients (100% Egg Replacement): All Purpose Flour, Butter, Sugar, Water, Milk, Whey Protein Concentrate, Baking Powder, Lemon Extract, Vanilla Extract, Salt, Xanthan Gum, Cellulose Gum.

CONTROL with egg
